LWM Program

NRBG Program:

7. *Project Name:* **2010 LWM - Chippewa River Watershed** *Module:* Initiative *Reported By:* Swift COUNTY

Initiative Type: Monitoring/Data Collection *Initiative Year:* 2010

Description:

Provide funding to the Chippewa River Watershed project for ongoing monitoring/data collections

Actual Results:

The Chippewa River Watershed continued to engage in the core activities of monitoring, outreach and water quality improvement practices during 2010, there were also new opportunities to expand and widen the scope for achieving the goals of reduced flooding, improved water quality, and connections with natural agricultural, industrial, and tourism-based economies. 2010 marked the second year of the increased monitoring plan and was a part of a Surface Water Assessment Grant. The additional water quality monitoring sites, the newly established base-stream study sites and the inclusion of all the data in the statewide storage system will play a key role in future planning and protection / reduction strategies. Staff is busy analyzing all of the data collected over the last two years and will have a report available which will be accessible on the website. The Chippewa River Watershed Project collaborated with the Land Stewardship Project on a new initiative called The Chippewa 10% Project. This initiative is multi-pronged but the basic premise is the idea that adding diversity to the land that is farmed can provide multiple benefits to the region including maintaining local communities, retaining/creating/keeping capability, providing locally grown food and fuel and a healthy, clean environment. The goal is to provide new options for landowners to incorporate perennials into their operations and make them a feasible and economical venture. Producing positive impacts in the Chippewa River Watershed can happen without changing the entire regional landscape. Current data suggests that changing farming practices on just an additional 10% of the watershed's agricultural land can be enough to make advances in water quality and increased benefits for local landowners and local communities. A fall field day was held in the watershed and more opportunities through this project are being planned for the spring and summer.

8. *Project Name:* **2010 LWM - Pomme de Terre Watershed** *Module:* Initiative *Reported By:* Swift COUNTY

Initiative Type: Monitoring/Data Collection *Initiative Year:* 2010

Description:

Actual Results:

Conduct a draft turbidity TMDL for Muddy Creek to Marsh Lake impaired reach.
Hold public informational meetings.

PDT Watershed Project 2010 accomplishments:
BPA 319 Grant Work Plan was approved and planned money available beginning in September 2010. Dirt Butler was implemented using 60% of the BPA 319 grant fund before the end of the season. Turbidity TMDL was conducted at final stage after meeting for the implementation plan. Data was analyzed late in December allowing us to move forward with the implementation plan.

2009 lake assessment grant was closed. 2011 lake assessment grant was applied for in November.

Coordinator resigned in June/July, new Coordinator hired in middle of October.

Technical Advisory Committee meetings are now held monthly.

12. *Project Name:* **2010 LWM - HHW Facility** *Module:* Initiative *Reported By:* Swift COUNTY

Initiative Type: Education/Information *Initiative Year:* 2010

Description:

Inform and educate citizens regarding household hazardous waste - proper storage, collection and disposal. Educate, inform citizens regarding regional household hazardous waste facility in Willmar, MN. Swift County will collect unusable paint and transport this to the HHW facility in Willmar. Funding will be used for program and staff administrative costs.

Actual Results:

Swift County hosted a household hazardous paint collection event in September, 2010 where 570 gallons of unusable paint was collected and transported to Kandiyohi County's Household Hazardous Waste Facility in Willmar, MN. Approximately 50 gallons of paint were reused by citizens of Swift County for personal use. The citizens of Swift County brought approximately 200 more gallons of unusable paint to the household hazardous waste facility.
