

Section 13: Hazardous Materials

General Information

I PURPOSE

To describe procedures for managing a hazardous materials release in Swift county.

II RESPONSIBILITIES

- A. The Swift County Emergency Manager will maintain a record of potential hazardous materials concerns and a plan of action for accomplishing response to such disasters.
- B. Each facility has its own equipment subject to the requirements of SARA Title III. See 302 Facility Document.
- C. Sight and smell

Standard Operation Guide to Section 13 Hazardous Materials

I PURPOSE

This SOG is intended to provide general information and guidance necessary to provide response to a hazardous materials release in Swift County.

II RESPONSIBILITIES

- A. The local fire department will be responsible for initial response, incident command, and assessment of a hazardous materials incident.
- B. If a hazardous materials release is beyond the capabilities of local fire departments, the Swift County Sheriff's dispatch via the DPS-HLSDEM Duty Officer will contact the nearest Hazardous Materials Assessment and Response Team. The Swift County Emergency Manager will be responsible for implementing a response based upon recommendations such teams may make.

III ADDITIONAL INFORMATION IS OUTLINED IN THE FOLLOWING

Guidance for Hazards Analysis, the U.S. DOT Emergency Response Guidebook, CAMEO, ARCHIE, or other computer software, facility preplans, and or other system. A hazard analysis has been completed for the following facilities.

The area of the population at risk for each of the above listed facilities is described in 302 Facility Documents and Maps.

Facilities within the county that possess extremely hazardous materials are required to develop and maintain emergency response plans as specified in 29 CFR 1910.120, or emergency action plans as specified in 29 CFR 1910.38 (a) that their employees will follow in the event of a release of those materials. At the minimum, facilities are required by law to immediately notify the following in event of an accidental emergency release; local authorities by dial 9-1-1, state authorities by contacting the State Response Center (DEM duty officer) by dialing 649-5451 (Metro) or 1-800-422-0798 (Greater Minnesota), and the National Response Center by dialing 1-800-424-8802.

The following facilities have developed emergency response plans for on-site response:

See 302 Facility Document listed in Resource Manual.

Hazardous Material Response Capabilities

Within the county, the fire department(s) has/have the primary responsibility for responding to hazardous materials incident. This/these department(s) is/are trained and equipped to the following levels of hazardous materials response:

AGENCY	LEVEL OF RESPONSE
Appleton	All fire departments are trained to the awareness level.
Benson	
Danvers	
Kerkhoven	
Murdock	
DeGraff	
Clontarf	

In addition, the volunteer search and rescue may participate in the response. These departments have developed emergency response plans as appropriate for their level of hazardous materials response capability.

First responders will begin their determination of the area affected by a hazardous materials release by identifying/verifying the hazardous materials (s) involved. For the most part, they will then reply on the following methodology to determine the need for evacuation, and the area of the county to evacuate: U.S. Department of Transportation Emergency Response Guidebook.

A listing of emergency equipment and facilities owned by public agencies and available for use in response to a hazardous materials accident is located in the Swift County Resource Manual.

A listing of emergency equipment and facilities owned by facilities and available for use in response to a hazardous materials accident is located in the Swift County Emergency Plan.

A description of the evacuation/shelter-in-place procedures/information to be used for the protection of the public in the event of a hazardous materials release is contained in Section 7 - Evacuation, Traffic and Security.

STATE SUPPORT

In the event of a hazardous materials incident that is beyond the capabilities of county government, assistance from state agencies can be requested. Such request should be submitted to the DEM duty officer.

FEDERAL SUPPORT

In the event of a hazardous materials incident that is beyond the capabilities of county and state government, the National Regional Response Team can be requested through the Minnesota Pollution Control.
